

How to Add properties

Adding properties to the real estate platform is quick and easy.

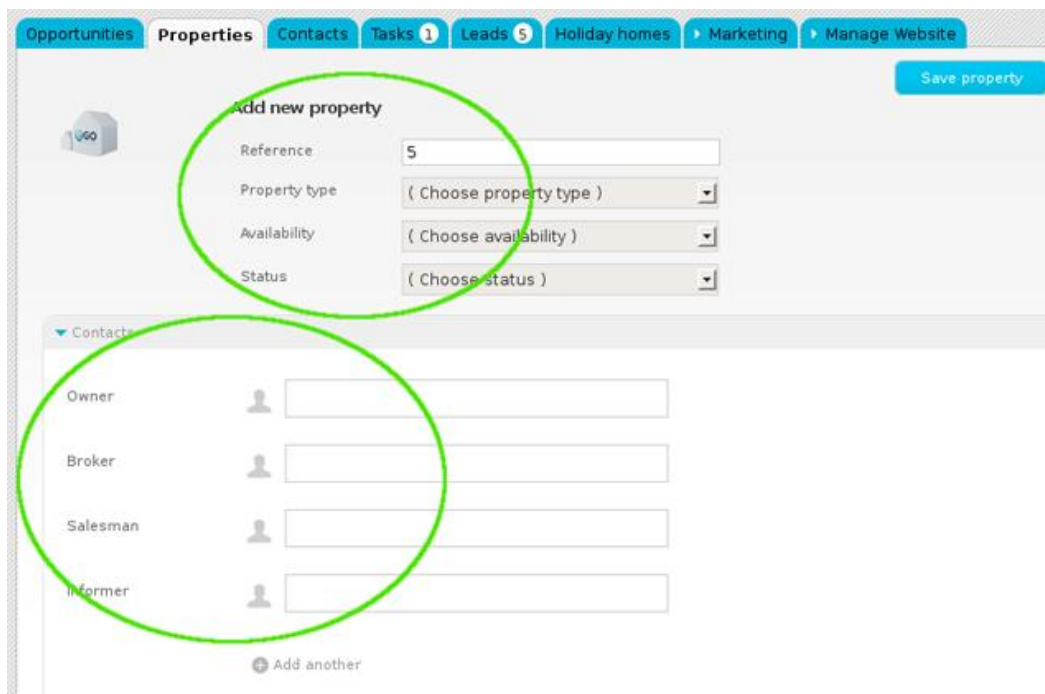

To do so, take the following steps:

1. Click the 'Properties' tab. Then on the right sidebar, click 'Add new property';

2. Complete the new property form with specific information regarding this property and related:

Contacts

Price and location

Business/Price Price

Great Britain, Po... For (Choose business deal) [Remove](#)

[+ Add another](#)

▶ More info

▼ Location

Country	United Kingdom
District	London
Town	Inner London
Neighborhood	City of London
Zone	Tower
Zip code	<input type="text"/>
Road type	(Choose road type)
Address	<input type="text"/>

Export address
 Export georeference

3. Select the option to export to sites (if this is intended);

4. Set permissions for who can see this property (Everyone, only the user adding the property or this user plus a restrict group of users);

5. Finally, click the **'Save property'** button.

The image shows a screenshot of a web form. At the top, there are several empty input fields. Below them is a button labeled "manage extra fields". The word "roperty" is visible on the left side. At the bottom right, there are two buttons: "Save property" (highlighted with a green circle) and "Cancel". At the bottom of the page, there is a footer with navigation links: "Users | Groups | Support | FAQ | Updates |" followed by flags for Spain, Portugal, Brazil, Canada, and the United States. Below the flags, it says "service by Janela Digital. Privacy policy | Terms of service".
