How to add watermark to photos

The application manager has the possibility to add a watermark to the photos inserted in the application quickly and easily.

The application user can help protect images by adding a watermark on the photos.

To do so, take the following steps:

1. Click on 'Settings' in the footer of the application;

	Create sale opportunity
nd opportunities	O Create rental opportunity
Group, Responsible, Co-responsible, Status)	Create listing opportunity
advanced search	O Edit timelines
	Quick search
pportunities, active, recently added.	Tags 🕕

		Visits to the property
		Appraisals
	10	

By applying watermarks to the photos, consider the following recommendations:

- We advise users to always make a backup of the photos before adding a watermark, not to run the risk of losing the original photos since the watermark is permanent.

- Watermarks will only be added to the photos once this option is activated in the application 'Settings'. Therefore, the watermark will not be applied to photos previously inserted into the system.
