## eGO Academy

## How to enable languages on website

The application manager has the possibility to have a multi-language website, ideal for expanding business to any market worldwide.

.....

eGO Real Estate offers a website with two languages upon subscription. The user defines which language, by default, to display the website and what other languages are made available. To add more languages apart from the first two, you will have to purchase the language feature. (Note: Please consult us for a full list of languages available.)

To enable languages on the website take the following steps:

1. Click the 'Manage Website' tab;

2. On the left sidebar, click on the 'Other features' section;
