

Recommended Image Formats and Sizes

It is important to use the appropriate sizes and formats to ensure:

- Good visual quality
 - Page load time reduced
 - Less disk space occupied
-

Image Sizes

For images taken with a camera, adjust the settings to a 4:3 aspect ratio.

For images created manually with programs such as Photoshop, Illustrator, Gimp, etc., set the image size to 1600×1200 px.

eGO Real Estate also accepts other image sizes besides the ones mentioned above. However, the application automatically resizes these images only in size, not the disk space it occupies. In other words, the visual result is the same but it will occupy more disk space.

Therefore, we recommend the following:

- **1600×1200 px (Recommended image size)**
- **1024×768 px (Minimum image size)**
- **2560×1600 px (Maximum image size)**

Image Formats

eGO Real Estate allows the insertion of images in different formats, such as:

- **.jpeg (Recommended format)**
- **.png**
- **.gif**
