

How to copy permissions for associated users?

"Copy permissions for associated users" allows you to apply the same permissions to all members of a certain group.

To do so, take the following steps:

1. On the footer, click 'Groups';

2. Select a group or add a new one;

3. Set the permissions for the group and tick **"Copy permissions for associated users**" to apply this configuration to all the members of that group.
