

How to export a property georeference?

The eGO user has the possibility of showing properties exact location on the website.

This can be done when creating a new property or when editing an existing one.

To do so, take the following steps:

1. Go to '**Properties**' tab and, on the right menu, click '**Add new property**' or edit an existing one;

The screenshot displays the eGO Academy software interface. At the top, there is a navigation bar with tabs: Opportunities, Properties (highlighted), Contacts, Tasks (0), Leads (1), Holiday homes, More, and Manage Website. Below the navigation bar is a search section titled 'Find properties' with a search input field and a dropdown menu set to 'All properties'. A list of 139 properties is shown, with the first property highlighted: 'Office / Practice, ESC_166'. The property details include: 'City of Westminster, Greater London, London', 'For sale: £845,000', 'Status: New', 'Net area: 120 m²', 'Gross area:', and 'Land area:'. A description follows: 'Large Office in the Executive Office building with 6 lifts, common meeting rooms and beautiful reception. Office with 120 m 2, reception, 2 bathrooms per floor and with an excellent solar orientation.' The property is marked as 'Available'. On the right side, there is a vertical menu with options: 'Add new property' (highlighted), 'Add new development', 'Quick search', 'Tags', 'Fast Edit', and 'Help'. At the bottom of the menu, there is a link to 'eGO Real Estate Academy'.

2. Open the property register by clicking 'edit this property';

The image shows a web-based location selection interface. At the top, there is a 'Location' section with several dropdown menus for 'Country', 'District', 'Town', 'Neighborhood', 'Zone', and 'Road type', and a text input for 'Address'. Below these are two checkboxes: 'Export address' (unchecked) and 'Export georeference' (checked). The main part of the interface is a map of London. A blue location pin is placed on the map, with a text box above it displaying coordinates: 'Lon: -0.15895843505859375°' and 'Lat: 51.51045188624856°'. Three green circles highlight specific features: one on the zoom in (+) and zoom out (-) buttons, one on the 'use my current location' button, and one on the 'enter the coordinates manually' button. The map shows various streets, landmarks like Hyde Park, and the River Thames. The Google logo is visible in the bottom left corner of the map area.

5. After ticking 'Export georeference' click 'Save property'.
