Powerful display and sorting system of properties

The eGO Real Estate user can choose the display mode and sorting system of the properties to only show what the user wants to see.

To set the **display mode** of the properties take the following steps:

1. Access the 'Properties' tab. The default view is Mosaic.

 In the Mosaic mode, the information regarding the property is static. Information such as: Property reference, Location and business deal, Availability, Status, associated tags, as well as quick action buttons.

3. If the user wishes to change the display mode to the tabular view, simply click

on the display button (mosaic list), to switch between display modes (tabular list).

 The `Mosaic' and `Tabular' mode of the `Properties' tab also allows the user to sort the properties according to certain criteria.

To sort the properties in the mosaic mode, just choose the criteria in the menu

`Order by';

9. In the tabular mode i tis also possible to sort the properties in the menu 'Order

by′,
